DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Appeal Brief, filed 12/4/2006, with respect to Claims 61-72 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

Allowable Subject Matter

2. Claims 61-72 are allowed.

3. The following is an examiner's statement of reasons for allowance: the prior art does not disclose a symbol generator that generates a flight path that is to be intercepted, a first symbol indicating a position of the airplane relative to the flight path, a first indicator attached to the first symbol a second indicator that is attached to the first indicators, a third indicator that extends tangentially from said second indicator in combination with the other details of the symbols. It should be appreciated that the phrase "is arranged to generate" is limiting to the invention as claimed. After consulting with other primary and supervisory examiner it was determined that in order for the prior art to read on these claims the prior art would have to specifically teach each of the symbols as they are claimed. It should also be appreciated that the claims are not limited only to their capabilities. Instead the claims are limited to the symbols being generated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
